

I would like to tell you about where I would like to study. I think that every child would like to study in a modern school with experienced teachers. Now I study at Grammar school number 6 in Gubkin. I like this school. On my opinion is the best school in our little city. Our headmaster and form teacher do comfortable timetable. Everyday we have interesting subjects. Of course teachers at school number 6 are educated and know their subjects very well. Teachers who work in our school are very good. We have a big gym and a sports ground. Here we play different games and relax after difficult lessons. It is very important for pupils. Many pupils like sport and I like too.

Nowadays most children like reading books very much. I think that modern schools should have big library, and our school has it as well. Usually students go there to take interesting books or interesting magazines. Our counselor does some interesting and fascinating school activities, to make our school free time not very boring. Many pupils like it. My class usually takes part in these interesting competitions and we usually win. And the most important thing at school is a good canteen. Our school canteen is very big. Cookers cook very tasty dishes for us. Most of students like school pizza, it is a traditional school food. It helps me in difficult situations. Here is an atmosphere a friendship and I go to school with pleasure. That's why I would like to study only here and nowhere else.

Daria Chernyh, a year-9-student, Grammar School 6
